Additional Information

I was born in the beautiful city of Ivano-Frankivsk, Ukraine. I started developing simple webpages when I was eleven years old. Then I decided to improve my web developing skills and went to a computer school where I learned web development and programming basics. I graduated from Ivano-Frankivsk school #24. Finished Beetroot Academy Front End and Advanced JavaScript courses. I am currently studying computer engineering at Ivano-Frankivsk National Technical University of Oil and Gas. I continue to learn and improve my skills to create more advanced websites and applications.
